EXPERIENCE

Galapagos - Galapagos is a pioneering biotechnology company dedicated to transforming patient outcomes through cutting-edge science and innovation. As a fully integrated organization, we specialize in discovering, developing, and commercializing innovative medicines, with a strong focus on addressing unmet medical needs. The diverse portfolio spans across immunology, oncology, and other therapeutic areas, aiming to enhance the quality of life for patients worldwide. With a collaborative mindset, entrepreneurial spirit, and a team of over 1,200 skilled professionals, relentlessly pursue groundbreaking research and development to bring life-changing therapies to those in need.

Application Support / Software Engineer *August 2022 - present*
As an Application Support/Software Developer, I bring a wealth of experience in maintaining and enhancing legacy PHP applications. Throughout my time, I have demonstrated efficiently tracing and investigating issues, ensuring the smooth functioning of the PHP application. My proficiency in MySQL allows me to run queries with precision, enabling seamless data manipulation, updates, and deletions crucial for the application's performance.

In addition to PHP, I have actively contributed to the modernization of the system by working on the migration of application features written in Python.The skills and familiarity with AWS have been instrumental in deploying these Python-based features, providing enhanced functionalities and scalability.

Technology Stack and Tools: PHP, MySQL, Python, AWS, GIT, ServiceNow

---

Zephr - Zephr is a leading subscription experience platform, accelerating revenue growth for the world's leading digital publishing and media companies.

JavaScript Integration Engineer *August 2021 - August 2022 (1 year)*
Researching what a given 3rd party platform does, then reading through API documentation; mapping and documenting concepts in Zephr onto 3rd party platforms to provide useful interactions

Technology Stack and Tools: JavasScript, Typescript, React, Svelte, ECMAScript, REST API, Git, Bitbucket, Scrum, Jira, AWS,

---

Isobar Commerce Center of Excellence, EMEA - Isobar Commerce is a leading provider of e-commerce software, part of a large family of Isobar Global, a global digital agency.

Software Engineer *July 2019 - August 2021 (2 year 2 months)*
Worked as a Full-stack Developer in projects like Mestergronn, Shiseido, Disney, and Zwilling. I was responsible for implementing front end changes according to a design, making sure that web content promotes the highest level of accessibility. On the back end

side, most of the time I was responsible for creating API connections to export or/and import data as well as integrating 3rd party software.

Technology Stack and Tools: HTML, CSS, SASS, jQuery, Javascript, Bootstrap, ECMAScript, SalesForce, REST API, Grunt, Gulp, Git, Bitbucket, Scrum, Jira

CERTIFICATES & AWARDS

- Oracle Certified Associate, Java SE 8 Programmer I - Oracle
- Object Oriented Programming in Java - Coursera
- Computers in Business Certification - Harper College
- Google Developer Challenge scholarship - Google

EDUCATION

September 2020 - March 2023   University of London - BSc Computer Science (Remote/Online Degree)

September 2017 - May 2019   Harper College - Associate in Applied Science, Information Systems

December 2017 - February 2018   Udacity - Android Basics
